The Micron-20 website has a new look. The change is not only on the surface — we also reorganised the way you get to a price and to an order.

A price in seconds

The production and assembly calculators are one click from the home page. Enter size, quantity, layers and finish, and you get a price immediately.

Every lead time now also shows the **ready date**. The calculation skips weekends and public holidays.

Free shipping

Shipping within Bulgaria is free for orders above €100. For Greece and Romania the threshold is €500; for the rest of the European Union it is also €500, for consignments up to 10 kg.

Reorder from a previous order

Every order in your archive now has a button that loads the same settings back into the calculator — same size, same material, same options — and recalculates them at today's prices. There is no need to enter them again.

If the boards also need assembly, it can be added to the same order. The lead times add up and shipping is charged once.

Mobile version

The whole site, including both calculators and the client area, works on a phone. You can check a price when you have no computer or laptop to hand.

And a gallery

We added photographs from production and assembly — real boards, made here.

If you notice anything that does not work as it should, write to us at info@micron20.com . Your existing login details are unchanged.
